¹ Neutral detergent fiber (NDF) is an estimate of insoluble fiber, including cellulose, hemicellulose, & lignin. Crude fiber methodology underestimates total fiber.

Product

Irradiated

•

- Not all product combinations are produced regularly or stocked locally; extended lead times and additional fees may apply.
- Most products available in meal (M) form; extended lead time and additional fees may apply.
- The irradiated version is identical to the standard version, with the exception of packaging.
- The "9" in the second position of the product code denotes the product has been irradiated.

Autoclavable

•

The autoclavable version (S) differs in the level of vitamin supplementation, which is increased to account for presumed losses due to autoclaving.

Extruded

Certified

- For rodent diets, the combination of the extruded form and appropriate forification allows for superior autoclaving quality (decreased hardness and clumping) where problems are experienced with the autoclavable pellet form.
- There are no differences in the formula, ingredients, manufacturing standards, and quality control processes between non-certified and certified diets.
- A representative sample is tested for a panel of contaminants. This panel varies by region (US vs. Europe) reflecting differences in regulatory standards. Contact local representatives for more information.
- If diet is not stocked as certified, certification can be made available by request. Expect minimum order size and additional charges to apply.

Envigo Teklad Products Reliable, repeatable results

Known for superior customer service, technical expertise, and sales support.

Custom research diets

Control nutrients

- + Vitamin or mineral adjusted
- + Protein or amino acid adjusted
- + Lipid or fatty acid adjusted

Induce disease

- + Atherogenic (cholesterol, fat, cholate)
- + Diet-induced obesity (40-60% fat kcal)
- + High carbohydrate (fructose, sucrose)
- + NaCl adjusted
- + Cuprizone demyelination

Dose animals

- Control of gene expression doxycycline or tamoxifen containing diets
- + Addition of customer-supplied ingredients/compounds

Standard natural ingredient diets for multiple species

- + Global
- + Traditional

Bedding and enrichment

- + Contact
- + Non-contact

Medicated diets

- + Fenbendazole
- + Ivermectin
- + Uniprim

Complimentary consultation with our nutritionists
